

Alborz Petrochemical Industry Services

Producer of three-layer polyethylene bags (FFS)

About us

Alborz Petrochemical Industry Services Company, established in 2015, provides services to the petrochemical industries using new technologies. The phase one of the company produces three-layer films for packaging petrochemical products.

In the next phase, the production of other petrochemical downstream materials is included in our working schedule. Close contact with customers and Knowledge flow in company has caused to achieve different standards. Alborz Petrochemical Company operates as a private company through entrepreneurship and the use of modern technologies. Our company promotes its production by focusing on productivity tools including up-to-date machinery, professional human resources and proper supply chain management. Our policy emphasizes maintaining and increasing quality, productivity, environmental compatibility and customer satisfaction.

Technical specifications of three-layer film

Film thickness : 100 to 200 microns

Emboss width : 55 and 70 mm

Roll diameter : up to 1500 mm

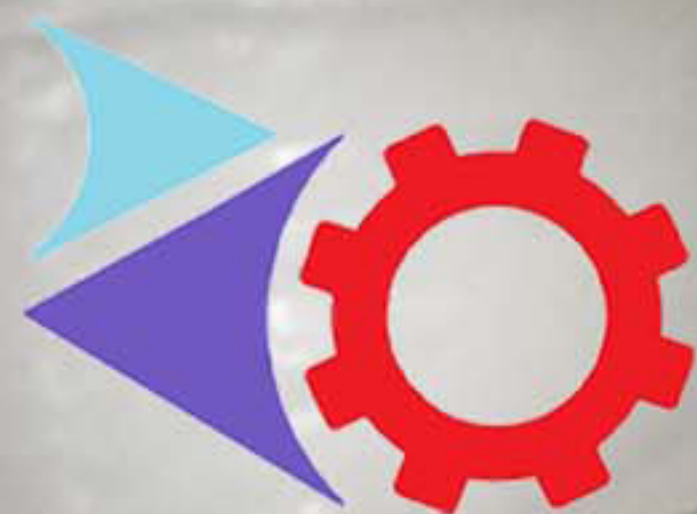

Raw film width : 450 to 650 mm

Print: 4 colors

FFS bag size

	W	Gusset
1	410 mm	70 mm
2	400 mm	65 mm
3	390 mm	78 mm
4	403 mm	65 mm
5	400 mm	75 mm

* It is possible to produce a bag on a custom basis.

Laboratory

The company also has a laboratory with complete equipment to perform the necessary quality control tests that are approved by the Aria SGS and Falat Pejvak inspection companies. The products inspection is performed in the presence of inspectors in the company's laboratory before sending them to the petrochemical companies

The list of laboratory equipment

- Dynamic and Static coefficient of Friction(COF)
- Melt Flow Index (MFI) Test Device
- Thickness Measurement Device
- Tear Resistance Test Device
- Dart Drop Test Device
- Tensile Test Machine
- Heat Seal Tester
- Density Meter
- Haze meter

Our customers

The products of this company have been examined and used by several petrochemical companies.

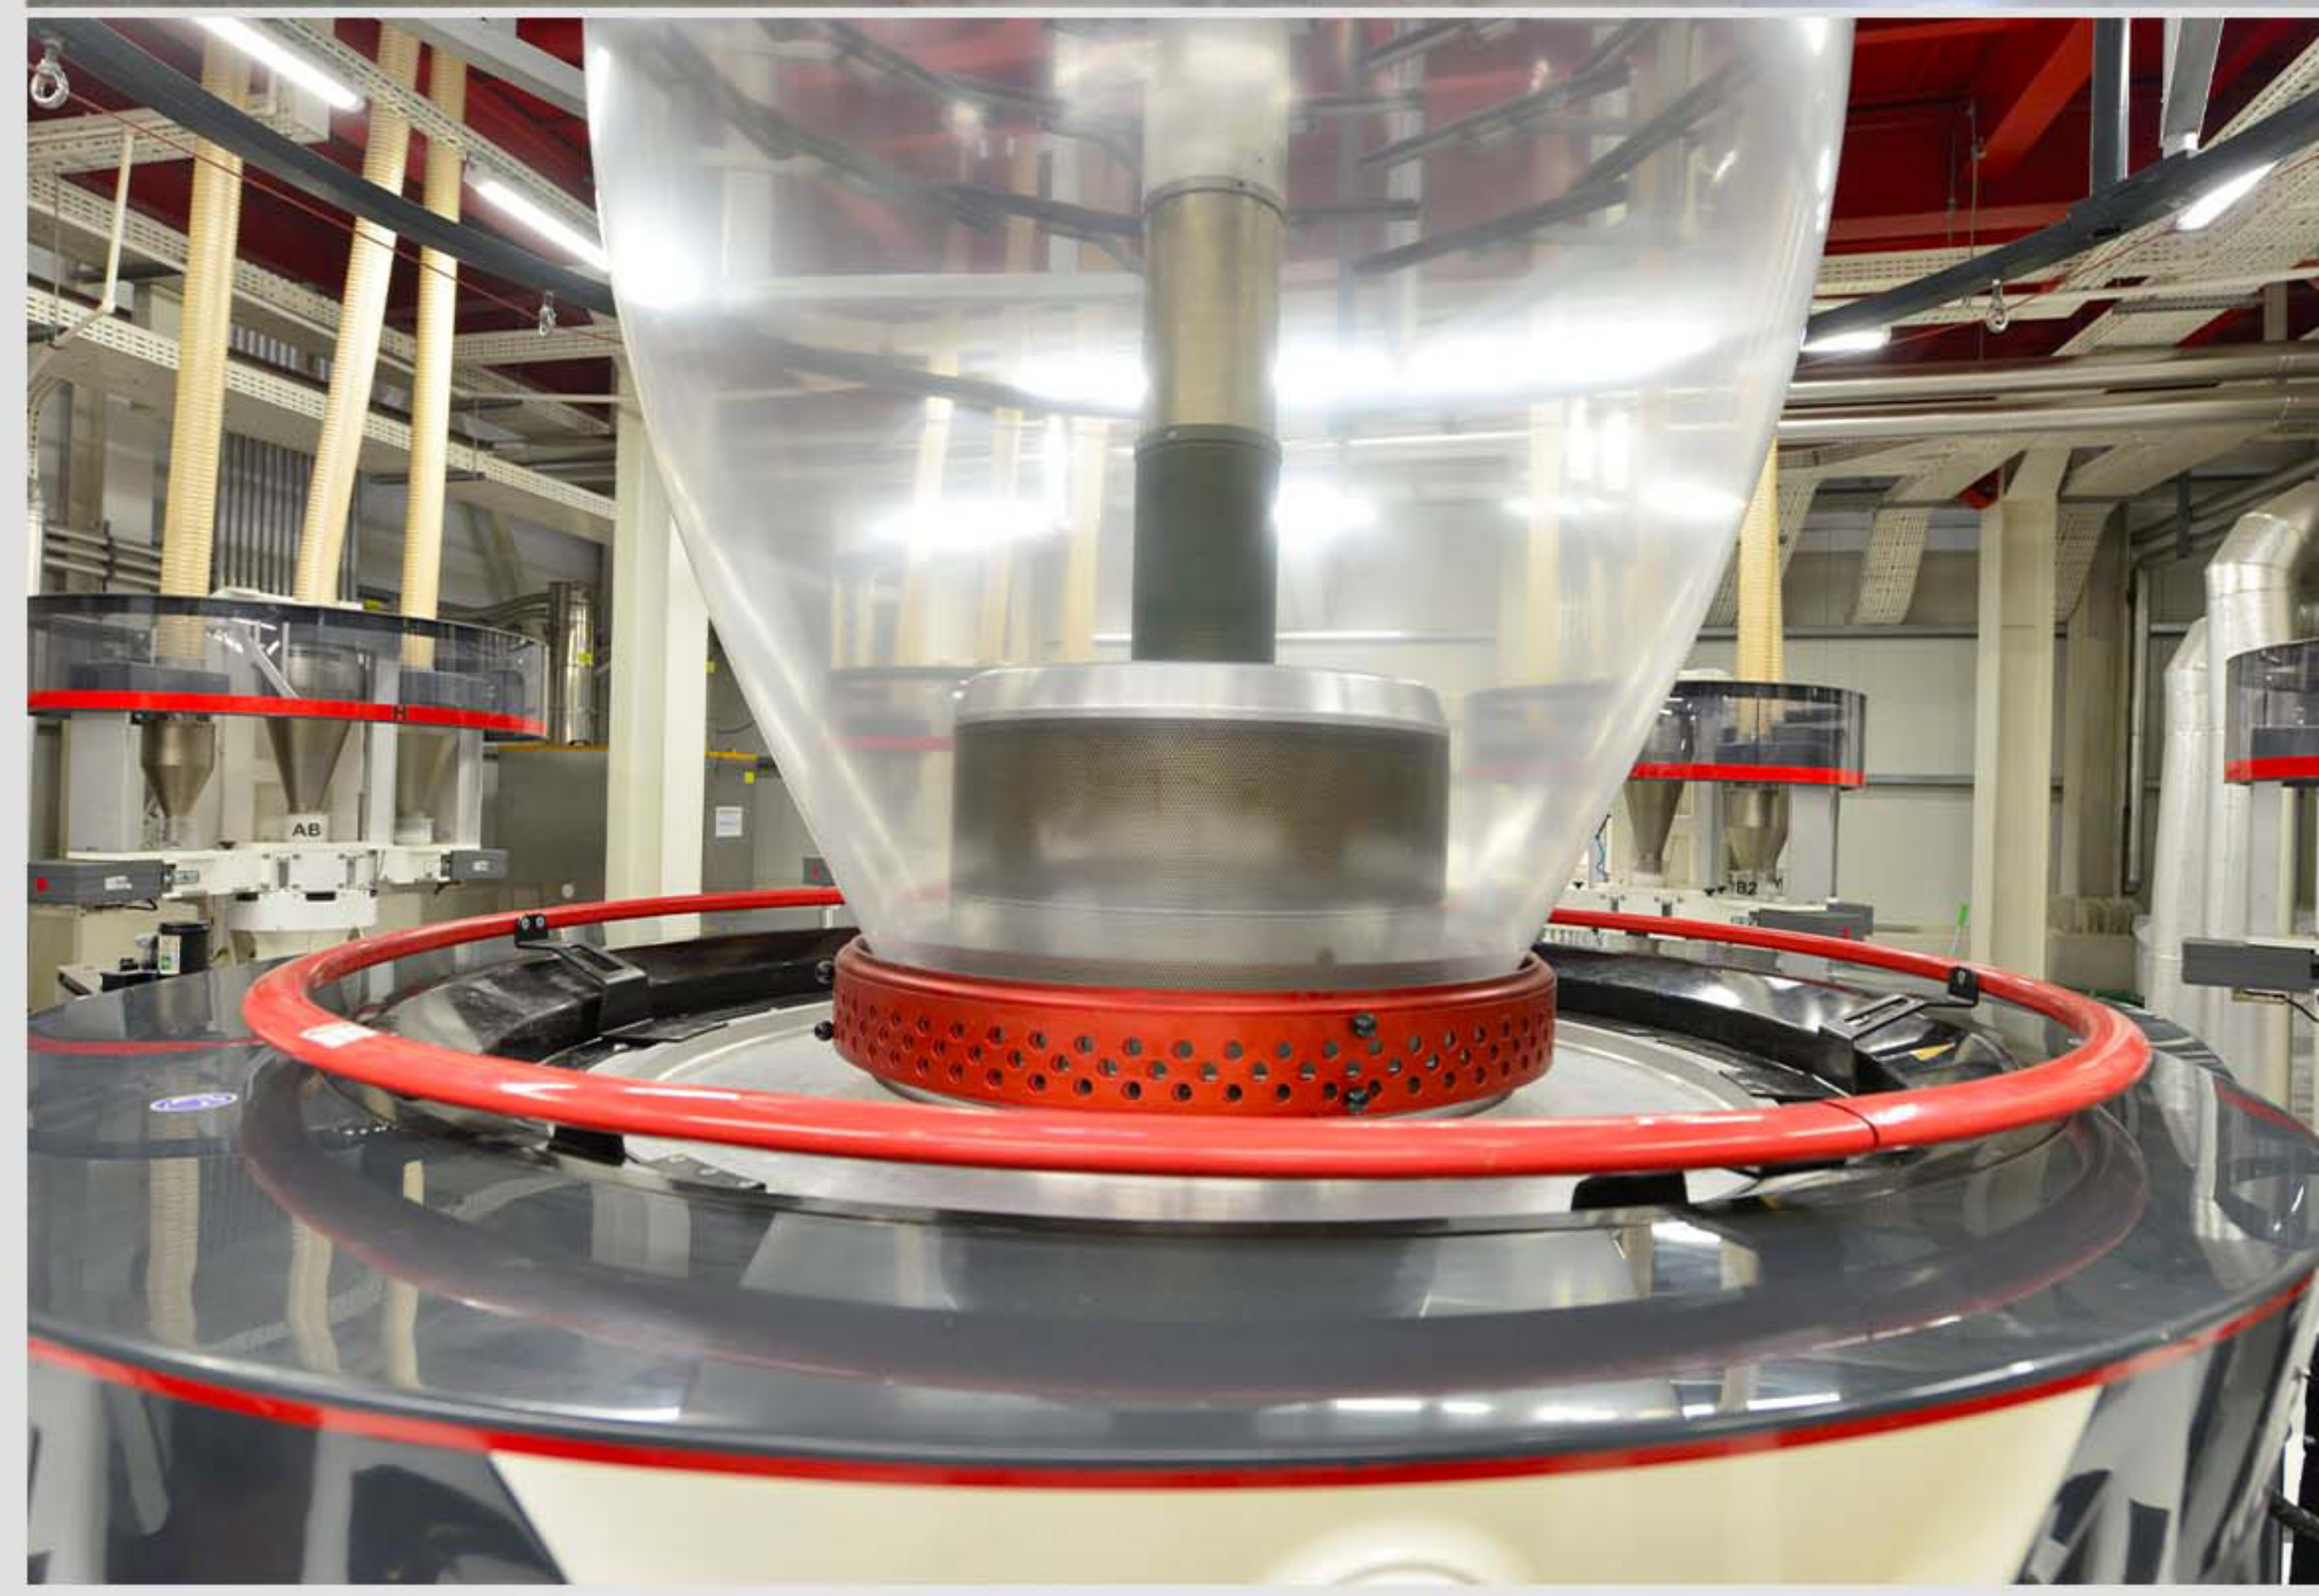

Kermanshah Polymer Petrochemical Company
 Kordestan Petrochemical Company
 Miandoab Petrochemical Company
 Mahabad Petrochemical Company
 Lorestan Petrochemical Company
 shazand Petrochemical Company
 Laleh Petrochemical Company
 Jam Petrochemical Company

Machinery

The machines used by Alborz Company are made by the Windmoller & Holscher Company, which is a collection of the most modern machines available in the world. Relying on the accuracy, quality and technology of these devices, our company has reached the highest quality production. Recently, the third line of the factory has been launched using 2020 model machines and has increased the company's capacity to 20 tons per day.

Our company has two 4-color printing machines that have the ability to print on both sides of the FFS bag. One of these printing machines is inline and works fully automatically. The second printing line is offline in which the printing operation is performed on the raw roll. Equipped with two separate printing machines has caused the customer orders be produced in the shortest possible time.
